EMB EMBROIDERY

This classic decoration method continues to be the most popular and affordable solution. Choose from hundreds of thread colors to give your branded apparel the right pop!

HT HEAT TRANSFER

Pre-printed art is heat pressed onto the garment. Perfect for capturing details in full color. This process has been refined over the years and is a great solution for performance apparel.

LZR

LASER ETCHING

Using laser technology, the top layer of a garment is heated slightly, creating a precise, tonal design. A versatile option for varying logo sizes and locations.

BHT

BORDERLESS HEAT TRANSFER

BHT has all the benefits and features of the standard heat transfer, digitally printed in full color, but with a clean, borderless edge and flexible material.

Big Sizes - Denotes MEN'S styles available in 5XL-6XL.

Big & Tall - Denotes styles available in 5XL-6XL sizes and LT-6XLT sizes. In some cases, up to 4XLT.

Women's Tall - Denotes WOMEN'S styles available in LT-4XLT sizes. In some cases, up to 2XLT.

Wrinkle-free - Fabric is constructed or treated to eliminate almost all wrinkles. Non-iron fabric requires very little maintenance.

Wrinkle Resistant - Made of fabric blends that resist wrinkles and creases. May require light touch-up.

Easy Care - Minimal maintenance styles that require little to no touch-up right out of the dryer.

Stain Resistant - Styles that help to repel food and liquid stains. Featuring Teflon™ Fabric Protector or 3M™ Scotchgard™ Fabric Protector.

Tri-Mountain UltraCool® - Denotes styles made of our performance moisture-wicking fabric that wicks away perspiration to increase your comfort under warmer conditions.

UPF Protection - Fabrics treated to provide an ultraviolet protection factor (UPF) of 20 or higher, protecting you from harmful UVA and UVB rays.

Anti-Microbial - Fabrics treated to kill germs, keeping you smelling fresh and odor-free.

Waterproof - Specially designed to keep all moisture out, features waterproof treatment on fabric and seam-sealed construction.

3-in-1 System Jacket - Jackets that can be worn three ways: Outer shell and inner shell together, outer shell by itself, or inner shell by itself. Offers maximum versatility.

Peak Performers - A selection of our top selling styles to fit your every need, at values you'll love.

Reversible - Reversible styles are two styles for the price of one! Turn it inside out for a completely different look. With our reversible styles, there's no true "inside out." Wear it either way for a fashionable appearance.

3-Layer Bonded - Jackets constructed with three layers: an outer shell bonded to a windproof and water-resistant middle membrane, bonded to an inner lining. Offers maximum protection against the elements in a compact package.

2-Layer Bonded - Jackets constructed with two layers: an outer shell bonded to a lightweight inner shell. Offers good balance of protection and lightweight feel.

ANSI Class 3 - Designed to comply with ANSI Class 3 standards for safety-specific applications. Available in safety colors including OSHA Orange and Lime Green.

ANSI Class 2 - Designed to comply with ANSI Class 2 standards for safety-specific applications. Available in safety colors including OSHA Orange and Lime Green.

EmbAccess - Hidden zipper access so styles can be embroidered without having to go through the lining.

Tagless - Features heat transfer label for greater comfort.

Relaxed Fit - Generous cut allowing for loose comfort.

Slim Fit - A modern fit with chest and sleeves cut closer to the body for a slimmer look.

Stretch Fit - Spandex fabric blend creates increased comfort and flexible fit.

WOVENS

A man and a woman are standing in a brick-walled setting, possibly a cafe or restaurant. They are both wearing denim shirts with a circular logo on the chest that says "JUICE FLIDE" and features a stylized leaf design. The woman is on the left, and the man is on the right. They are both smiling. The background is a brick wall with string lights hanging from it.

WORKWEAR

A man with short brown hair and a slight smile is wearing a brown zip-up work jacket with a black-lined hood. The jacket has a large front pocket and the brand name 'MUI-SOL' embroidered on the left chest. He is standing in a workshop or construction site with wooden walls and ceiling. In the background, there are white pipes, a yellow safety cage, and a window. The man is holding a red and black tool bag in his right hand.

SAFETYWEAR

WHEN LIVES
DEPEND ON IT,
QUALITY IS
PARAMOUNT

WHEN IT COMES TO SAFETY, TRI-MOUNTAIN MAKES YOU THE CENTER OF ATTENTION.

There's a reason work zone injuries are decreasing annually - more businesses are requiring their workers to wear safety gear that helps them stand out and stay safe. Hazardous traffic, heavy equipment and inclement weather are just a few things that are a part of the job for many workers. Making those workers seen and protected from on-the-job injuries is just a part of our job. With 28 different high-visibility products including ANSI Class 2 and Class 3 certified styles, our collection is simply the perfect safety accessory for the men and women whose hard work isn't always noticed.

ANSI class 3 is for use in the most severe environments. These workers need the highest level of visibility. Class 3-certified styles offer the greatest amount of fluorescent and reflective material.

ANSI class 2 is for moderately severe environments. These workers are on job sites with traffic that travels over 25 mph with a complex background. Class 2-certified styles offer a balance of fluorescent and reflective materials.

Our basic high-visibility safety clothing is color enhanced to add extra safety for those workers involved in low-risk activities.

MAKING SAFETY THE STANDARD

The American National Standards Institute (ANSI) is a non-profit organization devoted to ensuring the health and safety of consumers and the protection of our environment. Working with the International Safety Equipment Association (ISEA), ANSI developed the accepted standard outlining performance requirements for the visibility of safety apparel - ANSI/ISEA 107-2015. This standard specifies how much fluorescent background materials must be used, minimum areas

for retroreflective surfaces, minimum washing cycles and outlines test methods for materials. Our safety styles have been certified by independent laboratories to meet ANSI's latest standards for high visibility workwear, ANSI/ISEA 107-2015. As ANSI standards require, we have categorized our safety apparel into three Performance Classes based on task load, nature of the work, environment and lighting conditions.
